RULES MODIFICATION AND AMENDMENT

Article 14 Modification of Rules

- 14.1 The Rules of Competition may be modified by the Council.
- 14.1.2 The IAAF changes or modifies their rules each year. The WMA must review these rules, accept, reject or make WMA modifications. The Council will vote on the recommendations from the Competition Committee on the above.
- 14.1.3 Any application by an Organising Committee for rule modification must be lodged with the secretary not later than ninety (90) days before the commencement of the championship.
The Secretary, in close co-operation with the Technical Delegate (WMA Competition VP), shall submit a motion for Council decision, no later than seventy-five (75) days before the Championships.
- 14.2 **Amendment of Rules Requested by a Member**
Amendments to Rules of Competition requested by the Members shall first be endorsed by the Regional Council of that Member. The amendments shall then be submitted to the WMA Secretary within 30 days of the endorsement. The WMA Secretary shall then communicate these to the WMA VP Competition who shall have these modifications reviewed by the Competition Committee. Recommendations will be communicated to the WMA Secretary who will then circulate the recommendations to Council, who will make their own recommendations and comments. These recommendations and comments from Council will be sent to the Competition Committee chair. These will be circulated to the Committee for final draft, which will be sent to the Regions and Members through the WMA Secretary for voting at the General Assembly.
- 14.2.1 The only rule proposals that will be discussed on the floor of the General Assembly are those which have been specifically requested in writing to the WMA Secretary by a Member within 90 days preceding the General Assembly.
- 14.2.2 The WMA Assembly will vote on the final adoption or rejection of each of the proposals and only those adopted will become effective. No proposed change of the same rule shall be submitted to a Regional or WMA General Assembly within a four-year period.

Construction: The weight shall consist of three parts: a metal head, the link, and a handle (grip).

Head: The head shall be spherical and of solid iron or other metal not softer than brass or a shell of such metal, filled with lead or other solid material. If a filling is used, this must be inserted in such a manner that it is immovable. The centre of gravity of the head, less the link(s) and the handle, shall be brass or a shell of such metal, filled with lead or other solid material. If a filling is used, this must be inserted in such a manner that it is immovable. The centre of gravity of the head, less the link(s) and the handle, shall not be more than 9MM from the center of the sphere.

Link: The head shall be connected to the handle by means of metal link(s). The link(s) shall be of sufficient strength to ensure that the link(s) cannot stretch appreciably while the weight is being thrown.

Handle (Grip): The handle (grip) may be either of single or double loop construction but must be rigid and without hinging joints of any kind. It must not stretch appreciably while being thrown. It must be attached to the link(s) in such a manner that it cannot be turned within the link(s) to increase the overall length of the weight.

Connections: The links shall be connected to the head by means of a swivel, which may be either plain or ball bearing. A swivel may not be used to connect the handle to the link(s).

Minimum Weight	Diameter

8. Indoor Weight

Construction: The weight shall consist of three parts: a head, a handle (grip), and a connection assembly which may contain a harness. The construction shall be such that no damage will be caused when landing on a normal sport hall floor.

Head: The head shall have a spherical soft plastic or rubber case filled with suitable material. The head shall return to its spherical shape after impact. If a filling is used, it must be inserted in such a manner that it is immovable. The center of gravity shall be not more than 9mm from the center of the head with the connection, handle, and harness removed or suspended.

Handle: The handle may be as permitted in the hammer or may be made of a round metal rod not to exceed 12.7mm in diameter. This rod is to be bent in a triangular shape so that no side exceeds 190mm nor is smaller than 100mm, inside measurement. A handle with no permanent connection point must have three sides of equal length. The handle shall be designed in such a manner so as to not stretch appreciably during a throw.

Connection: The head shall be connected to the handle by means of a harness and up to two metal links separated by an optional swivel. The harness shall have a minimum of four straps securely sewn together to form a sling. The links, swivel, and harness must not stretch appreciably during a throw.

Minimum Weight	Diameter	
	Min.	Max
15.88kg	145mm	180mm

APPENDIX B

Scoring of WMA Combined Events Competitions

The scoring of Master's Combined Events competitions is as follows. In all events the scoring procedure is exactly like normal IAAF Combined Events scoring with the addition of one additional step. That additional step is that the actual performance in each event is multiplied by the appropriate Age Factor to arrive at an Age Factored Performance. This Age Factored Performance (AFP) is then looked up in the current IAAF Combined Events Scoring Tables in the normal manner.

Age Factors: The Age Factors to be used for each gender and age group are listed below. Use the full, four place number for Age Factoring. Round the result of the multiplication as shown below. **Note:** the Age Factors automatically correct for the reduced WMA implements and distances. So a M65-69 man throwing a 5 kilogram shot can be looked up in the standard IAAF scoring table for the 7.26 kilogram shot put, after multiplying the actual performance times by the Age Factor, because the Age Factor takes into account the fact that he is throwing a smaller shot. The same is true with a W60-64 woman running 80 meter hurdles, .762 meter high with 7 meter spacing. The Age Factor automatically produces an Age Factored Performance that can be looked up in the standard IAAF 100 meter, .840 high, 8.5 meter spaced women's hurdle table.

Rounding: The general rule is that rounding is done so as to never give artificial aid to the performer. So, after multiplying the Actual Performance by the Age Factor, be sure to round all running events up to the higher one hundredth of a second and round all throwing and jumping events down to the shorter centimeter. Remember: Run up, Jump and Throw down.

Example:

M50-54 man runs a 13.12 second Actual Performance in the 100 meter event.
13.12 times .8996 Age Factor equals an Age Factored Performance of 11.802752
11.802752 rounded **up** equals 11.81 to look up in the standard IAAF Combined Events scoring table.
11.81 is awarded 689 points.

Example:

W35-39 woman jumps a 1.47 meter Actual Performance in the High Jump.
1.47 times the 1.0512 Age Factor equals a 1.545264 Age Factored Performance.
1.545264 rounded **down** equals 1.54 to look up in the standard IAAF Combined Events scoring table.
1.54 is awarded 666 points.

Scoring Tables: The scoring tables to use are the current edition of the IAAF "Scoring Tables for Men's and Women's Combined Events Competitions" and the various supplements that the IAAF has published. (See below for the formulas that describe the scoring in the tables) If a performance is being scored that does not appear in the tables, be sure to move to the performance that results in less points being scored, not more.

Example:

Looking up a male 66.06 second 400 meter, the 66.09 score must be used, not the 66.05 score.
66.06 is closer to 66.05 than it is to 66.09 but is faster than was actually ran.
66.06 therefore is awarded 230 points.

Example:

Looking up a male 12.36 meter shot put, the 12.35 score must be used, not the 12.37 score.
12.36 is equally close to 12.37, but 12.37 is further than was actually thrown.
12.36 therefore is awarded 628 points.

Hand Timing: If Combined Events running events, from 400 meters down (including hurdles), are hand timed, the times must be corrected before multiplying by the appropriate Age Factor. Then the score must be looked up in the fully automatic portion of the scoring tables (Note: The hand timed portions of the scoring tables are never used in Masters Combined Events scoring).

Hand Timing Corrections:

The IAAF corrections to apply are:

50 through 300 meters	add 0.24 seconds to the hand time
400 meters	add 0.14 seconds to the hand time
all above 400 meters	add nothing (use auto or hand time as is)

Example:

M40-44 man runs a 17.7 second hand timed .991 meter (39") high, 110 meter hurdles.

17.7 plus .24 Correction equals 17.94.
 17.94 times .9526 equals a 17.089644 Age Factored Performance.
 17.089644 rounds up to 17.09 to look up in standard IAAF scoring table.
 17.09 is awarded 615 points.

Example:

A M70 in the throws pentathlete throws the 7.26 kilogram (16 pound) weight 14.67 meters.
 14.67 times the 1.1408 Age Factor equals a 16.735536 Age Factored Performance
 16.735536 is rounded down to 16.73
 16.73 is looked up in men's weight table as 834 points.

IAAF Combined Events Scoring Formulas: The official IAAF scoring tables, as published in the IAAF "Scoring Tables for Men's and Women's Combined Events Competitions", are generated by the following mathematical formulas. The results of the formulas must be truncated to the integer and not rounded up. So a formula result of 674.999 is 674 points, not 675, and 872.001 is 872. The actual points formulas are as follows, with the three constants listed below for all of the Combined Events. Note that performances must be expressed in seconds, centimeters, or meters, as indicated.

For a given performance, the point score (P) is calculated using one of the following equations:

Track Events: $P = a * (b - T) ** c$ (where T is Time in seconds)
Jumps $P = a * (M - b) ** c$ (where M is Measurement in centimeters)
Throws $P = a * (D - b) ** c$ (where D is Distance in meters)

* means multiplied by and ** means raised to the power of
 a, b, and c are parameters whose values are listed below..
